Julie, as mentioned by Mindel, we had a meeting with Globalstar last Friday.

As expected, they expressed concern about the protection of MSS.

They did raise some good points about how exactly the conditions for operation in Channels 12 and 13 should be expressed. The attached document, which I intend to discuss with Michael Ha and Patrick (Mark is not at the office) this afternoon, incorporates these suggestions.

That is far from the level of MSS protection that Globalstar would like to have, but it maintains the balance that we had agreed in principle and expresses the out-of-band emission levels in the MSS licensed spectrum in a more general way.

Glad to discuss more if necessary.

Jose

They came in late on Friday. Jose can give you an update.

Sent from my BlackBerry 10 smartphone on the Verizon Wireless 4G LTE network.

Subject: Any Update on Globalstar

Just checking in to find out the status. I know Renee spoke with Gina to give her the high level summary of where we are in our thinking. Has Globalstar spoken with any of you? Have they offered any reactions? I had a voice mail from Dennis Roberson last Thursday wanting to discuss this topic but have not had a chance to connect with him. Thanks, Julie
